

A patient's MRI experience is transformed with the new 3-D virtual reality system offered at Community Hospital Anderson. From TV to the radio, the goggles provide multiple entertainment options, two-way communication with the technologist and dramatically reduce MRI gradient noise.

The Top 10 reasons Community Hospital Anderson is unique.

Reason No. 9: Picture this: Unparalleled imaging services

You can choose where you go to receive X-rays, MRIs, mammograms and other imaging services. Here's why you should choose Community Hospital Anderson:

- **Solutions for the claustrophobic or anxious.** MRI conscious sedation programmed and controlled by an anesthesiologist.
- **CinemaVision goggles.** It's like watching a high-res, 62-inch screen from 5 ½ feet away. Schedule your appointment during your favorite TV program and time will fly.
- **Advanced mammography.** Our Women's Center features digital mammography integrated with computer-aided detection (CAD).
- **You won't wait.** Imaging services are performed in the outpatient setting which means your appointment time won't be disrupted by an inpatient or emergency case.
- **Extended hours and fast results.** Evening and weekend appointments and generally a 24-hour turnaround on reports.

We're counting down the Top 10 reasons Community Hospital Anderson is unique. Be sure to look for No. 8 next Sunday.
